

Circum[®] Interdental Brush

World innovation

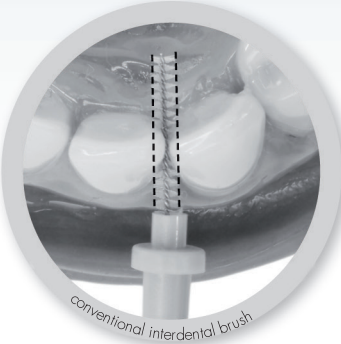

The waist-shaped Circum[®] interdental brush with **double** cleaning efficacy for teeth and implants.

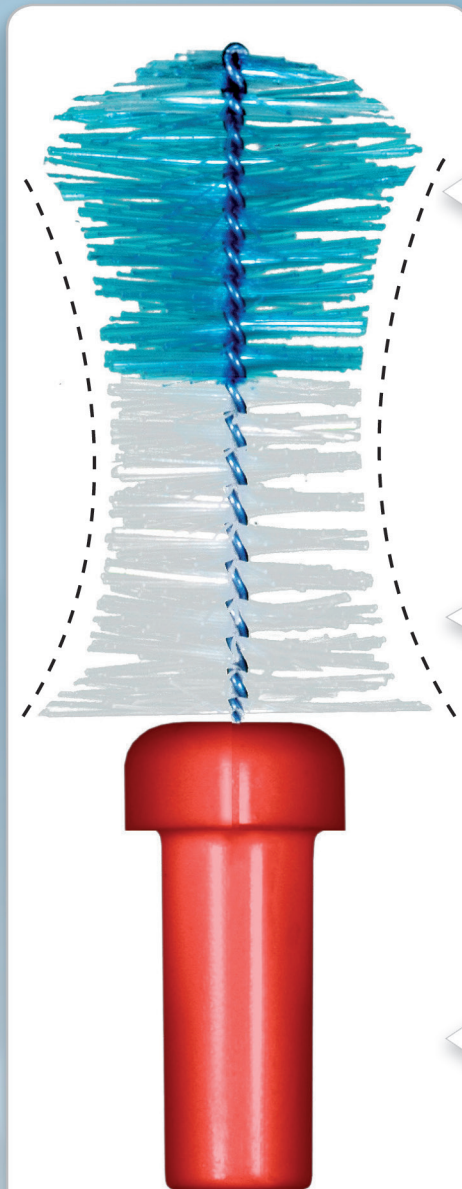

Around-the-tooth-cleaning in one movement.

Recommended for cleaning of prosthetical crowns, bridges and implants.

No cleaning possible of front, back and angles of the tooth.

Special shape

The fine filaments of the front part fold in for gentle insertion and unfold for efficient cleaning.

Thorough cleaning and mild massage of the gums

by the special waist-shaped brush.

Gentle care

Rounded shaft for gentle use. Fits on all Top Caredent holders. Fewer waste of material per brush.

Advice

Insert the corresponding Circum[®] brush gently into interspace.

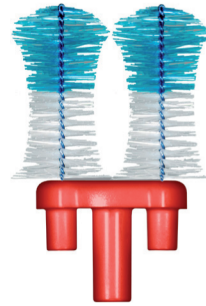

No forcing into narrow spaces.

Significantly superior cleaning effect with Circum[®], compared to conventional brushes. Confirmed by a double-blind clinical study !
